

The RSC-BMCS Lectureship

The Biological and Medicinal Chemistry Sector (BMCS) of the RSC invites applications/nominations for the BMCS Lectureship.

We live in a time of great change in medicinal chemistry. Both the process of drug discovery and the business models by which it is funded have fundamentally altered in the last generation. Yet the great benefits of new medicines to society are clear to everyone, and the expectations for future advances, as we seek to treat currently untreatable conditions, are also great. These are exciting times to be involved in medicinal chemistry. In order to inspire the next generation of medicinal chemists, we wish to appoint the next BMCS Lecturer from autumn 2024. In view of the excellent response to previous calls, we shall retain the option of making two appointments, one for academic years 2024-25 and one for 2025-26.

The person(s) appointed will have made a significant advance in the subject through developing new products or methods; there is no age restriction. He/she will be expected to deliver up to six lectures at six UK universities in one of the academic years, either 2024-25 or 2025-26, aimed particularly though not exclusively at undergraduate and postgraduate students.

Nominations should be sent no later than 30th September 2024 to: Hg3 Conferences, UK, e-mail events@hg3.co.uk

Applications should be very brief, explaining in a few sentences why the nominee should be considered and describing their contributions to medicinal chemistry. All applications will be acknowledged.

The Lectureship was first awarded in 2014. For more background, please see:
<https://www.rscbmcs.org/awards/lectureship/>
