

RSC-BMCS/CICAG Hot Topics **Robotics and Automation**

Thursday 21st November 2024
(afternoon)

Online Meeting

RSC-BMCS/CICAG Hot Topics

Robotics and Automation

Synopsis

The role of laboratory automation in pharmaceutical research and development is continually expanding, increasingly becoming entwined with software and workflow automation. This online, half-day meeting will bring together experts from both academia and industry to discuss recent advances in how we use laboratory automation in pharma and chemical synthesis.

The BMCS Hot Topics online meetings are intended to highlight breaking areas of research in fields of science relevant to drug discovery. They will run as stand-alone half-day virtual events, 2-3 times per year. The programme will be targeted towards researchers working who would like to enhance their understanding of these nascent or developing fields.

Registration

Registration is now open. Please [click here](#) to register.

Speakers

Speakers will be announced shortly, please keep checking the website for further information.

Organising Committee

Adrian Hall, *UCB*

Daniel O Donovan, *AstraZeneca*

Harriet Riley, *RSC*

Helen Aylott, *Redx Pharma*

Nessa Carson, *AstraZeneca*

Chris Swain, *Cambridge MedChem Consulting*
