

The RSC-BMCS

International Travel Prize Winner 2025

Biological & Medicinal

Chemistry Sector

The RSC Biological and Medicinal Chemistry Sector (BMCS) is pleased to announce the winners of the 2025 RSC-BMCS Travel Prize: Alex Anderton, University of Manchester; Murshida Begum, University of Surrey; Mabilly Cox, University of Warwick; Alfred Doherty, University of Strathclyde; Ellie Hyde, University of East Anglia; Eilidh McKay, University of Strathclyde; Niamh Morris, Rosalind Franklin Institute; Qiao Tang, University of Warwick; Will Thompson, University of Newcastle; Daniel Webb, University of Strathclyde.

The BMCS introduced the International Travel Prize programme in 2014 as an initiative to support, encourage and develop the training of next-generation research leaders. The winners receive funding of up to £2000 to support their attendance at, and travel to, high impact international conferences relevant to their research projects. The judges were extremely impressed with the quality and breadth of all the applications for the 2025 prize, and found it extremely difficult to pick out the eventual winners. The judging panel and all the members of the BMCS committee would like to congratulate the winners, and sincerely thank all the participants for the excellence of their applications.

Information about applications for the 2026 BMCS Travel Prizes will be available later in the year, check www.rscbmcs.org or www.rsc.org/bmcs for further information.

A C Williams, Hon. Chairman, BMCS
