RSC-BMCS Hot Topics: **Antibody – Drug Conjugates**

Synopsis:

Antibody-drug conjugates (ADCs), alongside other targeted modalities, effectively enrich target tissues with potent payloads unsuitable for systemic administration. With several recent clinical successes, the number of new ADCs approaching the clinic is rapidly increasing. This meeting aims to highlight the technological advancements and innovations driving these ADCs, while addressing the challenges and opportunities within the field. The Hot Topics session will feature speakers from industry and academia who are at the forefront of ADC design.

Registration:

Registration is open, please click [here](#) to register'.

Sponsor:

AstraZeneca 

Confirmed Speakers:

Mark Petersen, *Zymeworks*
Elena de Orbe Izquierdo, *AstraZeneca*
Tom Pillow, *Genentech*
David Spring, *University of Cambridge*

Organising Committee:

Sharan Bagal, *AstraZeneca*
Daniel O Donovan, *AstraZeneca*
Helen Aylott, *Redx Pharma*
Maximillian Lee, *AstraZeneca*
Charlotte Hardy, *Charles River*
Karina Chan, *GSK*
Hannah Fowler, *RSC*
