

# The RSC-BMCS International Travel Prize Winner 2026

The RSC Biological and Medicinal Chemistry Sector (BMCS) is pleased to announce the winners of the 2026 RSC-BMCS Travel Prize: Joshua Baxter, University of Oxford; Thomas Carton, Newcastle University; Rebekah Clarke, Swansea University; Spyros Letsios, University of Edinburgh; Eve Loughlan, University of Leeds; Fayanne Nolin, Trinity College Dublin; Harry Palmer, University of Strathclyde; Vanessa Rogga, Imperial College London; Emily Rushworth, University of Manchester; Jiri Ruzicka, Cardiff University; Nidi Singh, University of Galway; Claire Wong, University of Strathclyde.

The BMCS introduced the International Travel Prize programme in 2014 as an initiative to support, encourage and develop the training of next-generation research leaders. The winners receive funding of up to £2000 to support their attendance at, and travel to, high impact international conferences relevant to their research projects. The judges were extremely impressed with the quality and breadth of all the applications for the 2026 prize, and the gratifyingly large number of applicants, which combined to make selection of the eventual winners a pleasant challenge. The judging panel and all the members of the BMCS committee would like to congratulate the winners, and sincerely thank all the participants for the excellence of their applications.

Information about applications for the 2027 BMCS Travel Prizes will be available later in the year, check [www.rscbmcs.org](http://www.rscbmcs.org) or [www.rsc.org/bmcs](http://www.rsc.org/bmcs) for further information.

A C Williams, RSC-BMCS
